Arapahoe County seeking input from solar industry experts

Join Weatherization and Purchasing March 9

LITTLETON, CO --- Colorado is the first state in the nation to receive approval from the U.S. Department of Energy to integrate rooftop solar photovoltaic into the Weatherization Assistance Program.

The Colorado Energy Office is adding rooftop photovoltaic to the low-income weatherization program in the greater Denver Boulder Metro area. This three-year pilot project will be implemented by Arapahoe County Weatherization, Energy Resource Center and Longs Peak Energy Conservation.

Installing rooftop solar panels on homes qualifying for Weatherization will require working with existing solar installation companies. Arapahoe County Weatherization and Purchasing divisions are hosting an information gathering meeting for solar industry experts to share their expertise. This will provide important information to develop a formal procurement for the installation of rooftop solar systems.

When: 10 a.m., March 9

Where: Arapahoe County Weatherization, 907 Salida Way, Aurora, 80011

Attendees will be asked specific questions about their experience installing rooftop solar systems. Arapahoe County Purchasing also will provide an overview of the County's procurement process and how to do business with Arapahoe County.

RSVP to Donna Garrett at 303-636-1984. Walk-ins welcome. Learn more about Arapahoe Weatherization at <http://arapahoegov.com/weatherization>.
